

# 11: WHAT IS A HONEYBEE ?

NAME : \_\_\_\_\_

Honeybees make honey from nectar and live in hives that have been built by beekeepers.

They store the honey and use it as food for themselves when it's too wet or cold to go outside.

The queen bee is the mother of all the bees in the colony or hive.

Honeybees talk to each other by dancing a dance. When a honeybee wants to let its friends know where the best pollen and nectar is it does a figure of eight dance called the waggle.

## FILL IN THE GAPS

- Honeybees make honey from \_\_\_\_\_ .
- \_\_\_\_\_ build \_\_\_\_\_ for honeybees to live in.
- The \_\_\_\_\_ bee is the \_\_\_\_\_ of all the bees.
- Honeybees make and \_\_\_\_\_ honey to \_\_\_\_\_ .
- Honeybees talk to each other by \_\_\_\_\_ a dance called the \_\_\_\_\_ .
- The waggle dance lets \_\_\_\_\_ honeybees \_\_\_\_\_ where the best \_\_\_\_\_ is.
