

READING ACTIVITY: ARE THERE DIFFERENT TYPES OF BEES?

NAME : _____

In Ireland we have 21 Bumblebee species, 77 solitary bee species and one honeybee.

The Bumblebee is probably the most famous of all Bees. Bumblebee's are very important pollinators of crops like strawberries and tomatoes.

Solitary bees are bees that live alone and not in a hive or nest like honeybees or bumblebees.

The mining solitary bee likes to hibernate underground. Honeybees make honey from the nectar they collect. They live in hives that have been built for them by Beekeepers.

FILL IN THE GAPS

- There are 21 different types of _____.
- There are 77 different types of _____.
